Your Lightning Wallet

Android: BLW

Phoenix

Bluewallet

IOS: Bluewallet

Wallet of Satoshi

Lightning Flow

It's getting easier to start using Lightning

- Download a wallet (BLW, Phoenix, Bluewallet)
- Deposit Bitcoin
- Open channel (automatically?)
- Make (and receive?) payments
 - > custodial and non-custodial wallets

Send & Receive

- Receiver has to create invoice
- Sender has to scan/copy invoice
- Payment is made atomically
 - It's either made or not
 - It's never unconfirmed
 - It can't be stuck

Fancy Lightning

- Awesome LNURL
 - Static lightning invoices (lnurl-pay)
 - Login with your wallet (lnurl-auth)
 - Scan to withdraw (lnurl-withdraw)
 - Scan to open channel (lnurl-channel)
- Communication channels
 - Text
 - QR Code
 - NFC
 - Audio
